RE: Gary Jobs Corp Center
Superfund File No. TX1161630644
Our File No. 0111-87-H

Dear Mr. Hopkins:

Reference is made to your letter of February 8, 1988, to Senator Bentsen (attached). This office represents Maxwell Water Supply Corporation, particularly as to the Texas Water Commission (TWC) reporting/monitoring requirements for the landfill.

The TWC has previously required reporting by the City of San Marcos at several test well sites, near the Gary Job Corps Center location.

Accordingly, your letter should make reference to that data as a part of ongoing TWC data collection efforts.

May I use this opportunity to request that data be furnished to all parties---especially to the attention of David Gonzales, Environmental Protection Agency (TX-1161630644).

Because of the interest expressed by Senator Bentsen in his letter of February 11, 1988, to the Maxwell Water Supply Corporation Board of Directors, I am furnishing this response to the Senator.

Thank you for your response on the monitoring issue, which I feel certain will be of assistance to all of the parties. May I have your staff express its opinion concerning interpretation of the data which is included within your response.

Gary Jobs Corps Center
No. TX1161630644

Finally, because the source of potential contamination in both the former military base (now Gary Jobs Corps Center) and locally generated contaminants, such as farm-related heavy pesticides, herbicides and fungicides, etc., it seems appropriate that the TWC take an active role in working with the two counties and two local municipalities in providing a systematic plan to manage the monitoring to prevent pollution that could affect existing, although limited, ground water resources.

Very truly yours,

LOUIS T. ROSENBERG, P.C.
